MATTHEW ALEXANDER

s t u d e n t

PROFILE

Hello there! I am a full-time student at North East Scotland College currently studying HND Computing: Technical support. I have a passion for all things technology and am always looking to learn new skills and grow my understanding of technical systems.

I love technology so spend most of my free time undertaking various side projects such as my home file NAS for backing up files, tinkering with Linux systems and the website I made for my local church. When I am not doing personal projects, I also volunteer behind the technical sound desk of my local church, participate as a highly decorated scout of my Local explorer scout's unit and go running for fun and fitness.
